DISCLAIMER

This presentation has been prepared by Solaria Output y Medio Ambiente, S.A. (“the Company”) to be used exclusively during the announcement of its January – March 2011 results. The information and any statements made in this document have not been verified by independent third parties and no guarantee implicit or explicit is given to the impartiality or accuracy of the information and statements herewith expressed. The company, its advisers or representatives do not assume any responsibilities for any losses derived from the use or interpretation done with this document or its contents. This document does not constitute an offer or invitation to acquire or subscribe shares, in accordance of the following Spanish regulation “Leyes del Mercado de Valores”: Ley 24/1988, Real Decreto Ley 5/2005, Real Decreto Ley 13/10/2005 and other applicable legislation. This document does not constitute an offer to buy, sell or exchange shares or financial instruments, nor a request for votes to be delegated or approved under any jurisdiction. Neither this document nor any part of it constitutes a contract, nor may it be used to make an interpretation of any contract, agreement or compromise.

IMPORTANT INFORMATION

This communication does not constitute an offer to buy, sell, exchange or ask for an offer to buy, sell or exchange shares or financial instruments. The shares of Solaria Output y Medio Ambiente, S.A. cannot be offered or sold in the United Status of America, unless done through an effective notice as regulated in the Securities Act or Under a valid exemption of the obligation to notify.

FORWARD LOOKING STATEMENTS

This communication contains information, claims and opinions which include forward looking statements about Solaria Output y Medio Ambiente, S.A. Such information includes or may include projections and financial estimates, with its underlying assumptions, statements or announcements related to projects, targets and expectations related to future delays, investments, synergies, products, services and declarations about future results. The declarations about and including future projections and estimates are not historic facts or results and are generally identified by the use of words such as “expects”, “anticipates,” “believes,” “pretends,” “estimates” and similar words. Although Solaria Output y Medio Ambiente, S.A. considers that the expectations reflected under such type of claims are reasonable, investors and shareholders of Solaria Output y Medio Ambiente, S.A. must be aware that any forward looking statement is subject risks and uncertainties, most of which are difficult to anticipate and are, generally, outside the control of Solaria Output y Medio Ambiente, S.A., and are risks which may provoke that the real results and future evolution differ substantially from those expressed, implicit or projected in the information and forward looking statements herein contained. Among such risks and uncertainties are those identified in the public information sent by Solaria Output y Medio Ambiente, S.A. to the Spanish regulator Comisión Nacional del Mercado de Valores. Forward looking statements or projections do not constitute a guarantee or future performance and results. These have not been revised by the auditors of Solaria Output y Medio Ambiente, S.A. It is recommended not to make any decision based upon declarations or statements which forward looking statements referred exclusively to the date when these were made. All forward looking statements included in this document made or issued by Solaria Output y Medio Ambiente, S.A. or any of its board members, directors, employees or individuals acting as representants of the company are expressly subject to the warnings included in this notice. The claims or forward looking statements included in this document are based upon information available on the date of publication of this document. Unless obliged by the applicable laws, Solaria Output y Medio Ambiente, S.A. does not assume the compromise to update publicly its claims or revise any forward looking statements, not even if new data, facts or information becomes available.

Sales Q1 2011

		Q1 2011	Q1 2010	YOY
Sales. PV Modules	€ 000s	7,757	5,314	46%
Sales. Turnkey	€ 000s	6,645	3,080	116%
Sales. Generation and O&M	€ 000s	4,505	2,044	120%
Sales. Other	€ 000s	65	514	-87%
Total sales	€ 000s	18,972	10,952	73%
Domestic sales		19%	63%	
Export sales		81%	37%	

Consolidated financial data under IFRS. Unaudited figures.

As in previous years, Q1 2011 sales are seasonally affected. In this year, this effect is reinforced by the delay in passing new legislation in some of the countries where we conduct our activities. Group sales increase 73% vs Q1 2010 and exports continue increasing as a percentage of total sales.

Satisfactory evolution of sales in Generation and O&M (+120%) after nearly doubling the installed MW of this division in 2010. The high increase in Turnkey sales reflects the development of the PV plant Marche 2.

Sales Q1 2011

Profit and Loss (1)

In € 000s	Q1 2011	Q1 2010	YOY
Net sales	18,972	10,952	73%
Other income	569	470	21%
COGS	-19,320	-8,227	135%
EBITDA	221	3,195	-93%
% margin	1%	29%	
Depreciation	-2,503	-2,760	-9%
EBIT	-2,282	435	n.r.
Financial result	-1,242	-378	229%
Forex result & Chg in value of derivatives	2,024	163	1142%
Pre-tax profit	-1,500	220	n.r.
Taxes	2,210	-66	n.r.
NET PROFIT	710	154	361%
Net cash flow (Net profit + Depreciation + Provisions)	3,213	2,914	10%
% Net cash flow-to-Sales	17%	27%	

Consolidated financial data under IFRS. Unaudited figures.

Profit and Loss (and 2)

In Q1 2011 Solaria registered € 19.0 million in sales (YOY +73%, vs € 11.0 million), EBITDA € +0.2 million vs € +3.2 million in Q1 2010, EBIT € -2.3 million (€ +0.4 million in Q1 2010), Net profit € +0.7 million (YOY +360% vs € +0.2 million in Q1 2010) and Net Cash-flow (Net profit + Depreciation) € +3.2 million (YOY +10%). Sales' seasonality is reflected in a Q1 with lower sales vs Q4 2010 but with a significant growth rate vs Q1 2010. As in prior years, the weight of Q1 on the full year's sales and profits is to be modest and should not be considered as representative of the activity and results for the year.

The sales mix per division in Q1 2011 was more balanced than in prior quarters: PV Modules (41%), Turnkey (35%), Generation and O&M (24%). Exports continue to increase and now represents 81% of sales (77% CY-2010 and 15% CY-2009).

Regulatory delays and changes in legislation in Spain, Germany, France, Italy and the UK between Q4 2010 and March 2011 have prompted delays in client orders.

Our guidance for 2011 sales and EBITDA which we provided in the Q4 2010 results presentation remains unchanged. Several orders expected for Q1 2011 have been pushed back for Q2 2011. Solaria has 32 MW of firm module orders for delivery on or after Q2 2011. We expect that sales seasonality will be reflected –as in prior years- on a second half much more intense in sales than the first six months of the year.

Balance Sheet (1)

€ 000s	at 31 Mar 2011	at 31 Dec 2010

Hellas	567
S. Bohemia	5,116
<u>N. Bohemia</u>	<u>8,850</u>
Total	65,378

- (2) Stocks: PV Plants

Consolidated Annual Accounts 2010: "Note 4.13 Inventories: Photovoltaic solar plants owned by the Company are initially classified as inventories (...) if a photovoltaic solar plant has been in operation for more than one year and no sales contract or similar agreement has been reached with a third party (...) the plant should be allocated classified as an asset and depreciated."

Under this principle, Solaria accounts its own PV plants as Stocks during construction and in the first year of operation.

Consolidated financial data under IFRS. December 2010 figures are audited, March figures are unaudited.

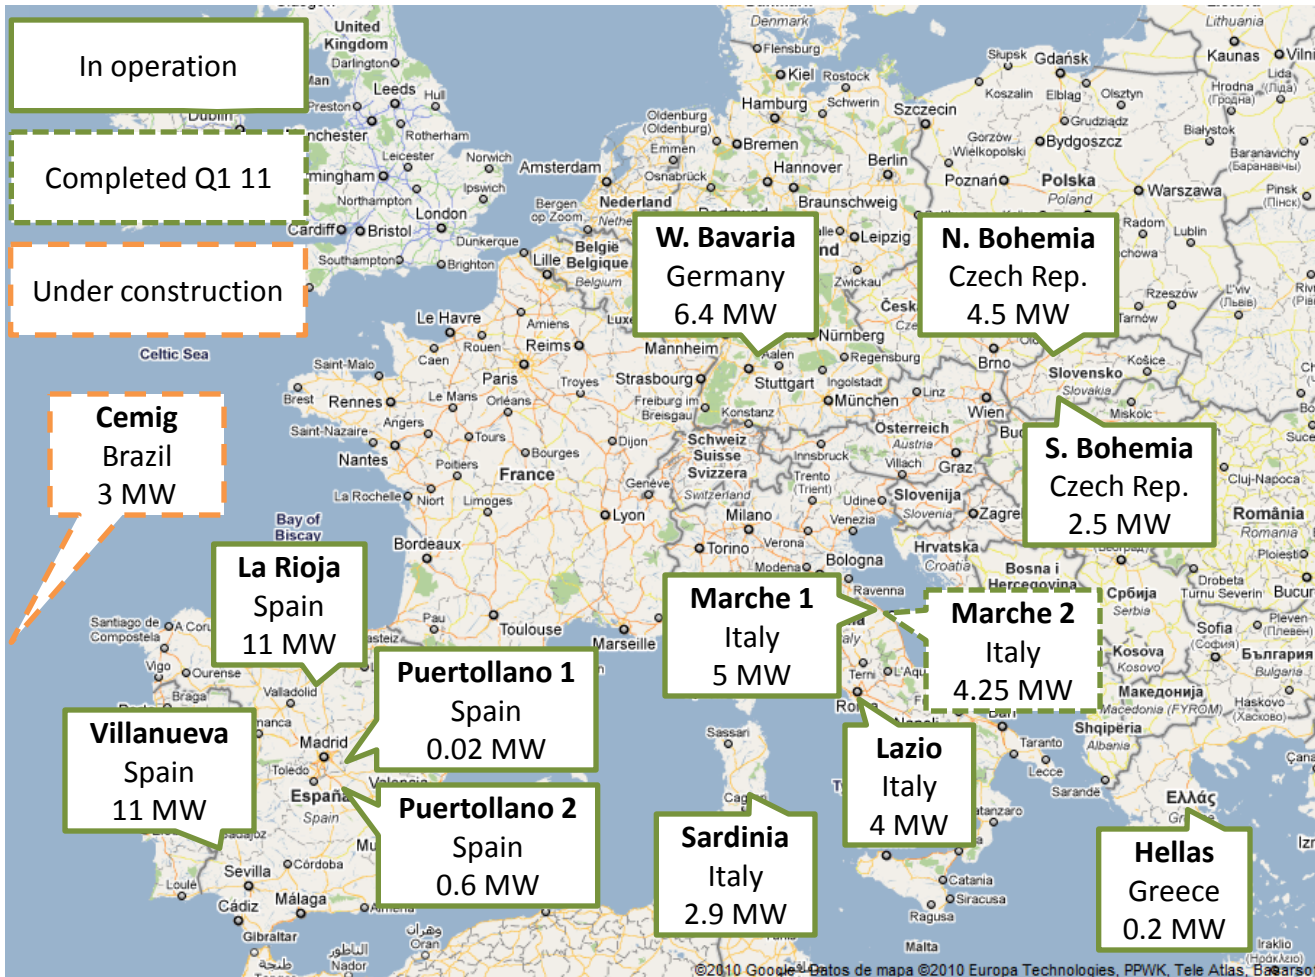

The main change in our Balance Sheet is a 9% increase in Inventories, primarily reflecting the construction of the PV plant Marche 2 (8.5 MW, 50% owned by Solaria) that was completed during the quarter and which we expect to connect to the grid shortly. This new plant positions Solaria in the leading group of solar PV generation operators with a portfolio of plants in excess of 52 MW.

In March 2011 our banking debt stood at € 131.2 million, almost unchanged in the quarter. On page 9 we show the breakdown between corporate debt and Project Finance debt. The ratio Net financial debt ex Project finance / Equity stands at a moderate 27% (21% at Dec-10), depicts a sound balance sheet and increases to 55% if Project finance debt is included.

The caption “Stocks” includes € 79.6 million (€ 77.1 million at Dec-10) of PV plants built recently and totalling in excess of 30 MW. These plants will be reclassified as non-current assets after 12 months in operation. This fact must be considered when analysing the composition of our working capital.

Improvements in Working capital management as a result of policies implemented in 2010 are reflected in a Working capital ex PV plants-to-sales ratio of 7%.

PV plants in operation and under construction at 31/3/2011

Evolution of PV plants

- 48 MW connected Dec-2010:

Villanueva	11 MW
La Rioja	11 MW
Puertollano 1	0.02 MW
Sardinia	2.9 MW
Lazio	4 MW
Marche	5 MW
Hellas	0.2 MW
N. Bohemia	4.5 MW
S. Bohemia	2.5 MW
W. Bavaria	6.4 MW
Puertollano 2	0.6 MW
- Completed in Q1 2011:

Marche 2 (50%)	8.5 MW
----------------	--------

Attributable to Solaria 4.25 MW
- Under construction:

Cemig	3 MW
-------	------

The Board will propose to the AGM, to be held on May 17th, a dividend cash payment against FY-2010's results of € 0.035 per share. This represents a 50% increase from the prior year's payment .

In addition, the Board is analysing the possibility of either cancelling the own stock held on the day of the AGM or to distribute it amongst the shareholders as an additional remuneration. As at 16th May 2011, Solaria holds 1,200,000 own shares (1.2% of the total shares in issue).

The Q1 2011 results demonstrate our positioning as a worldwide systems integrator and distributor of solar PV solutions. The results meet the strategic sales, roll-down of our generation business, international expansion targets and consolidation targets of Solaria as a key player in the international markets.

Germany and Italy are our two key target markets in Europe. Sales in Q1 to those two countries exceed 60% of the group's sales and we expect to increase this percentage in the coming quarters. In Latam, Brazil is performing according to our expectations and represents 10% of group sales.

After the recent regulatory changes, Italy offers a 10% premium to the feed-in tariff for plants that use components manufactured in Europe. This situation enables us to raise our expectations for sales to Italian clients and to enable our generation activities to obtain tariffs and ultimately returns on investment superior to those of other operators who source their components from non European manufacturers.

Our generation activities progress under the targets set and Solaria now owns over 52 MW of PV plants. Solaria is positioned in the leading group of solar PV generation operators with a portfolio of plants in excess of 52 MW. This activity outstands as our main growth driver and is to continue being the recipient of significant investments in the coming years.

The Board is to ask the AGM (scheduled for May 17th) for permission to pay a € 0.035 cash dividend per share (gross). In 2010, Solaria paid € 0.02€ per share. In addition, we expect to cancel the own stock held at the AGM (currently 1.200.000 shares) or to deliver this stock to the shareholders as a special dividend.
